General Service Questions

Acronis Cyber Protect - Create a protection plan

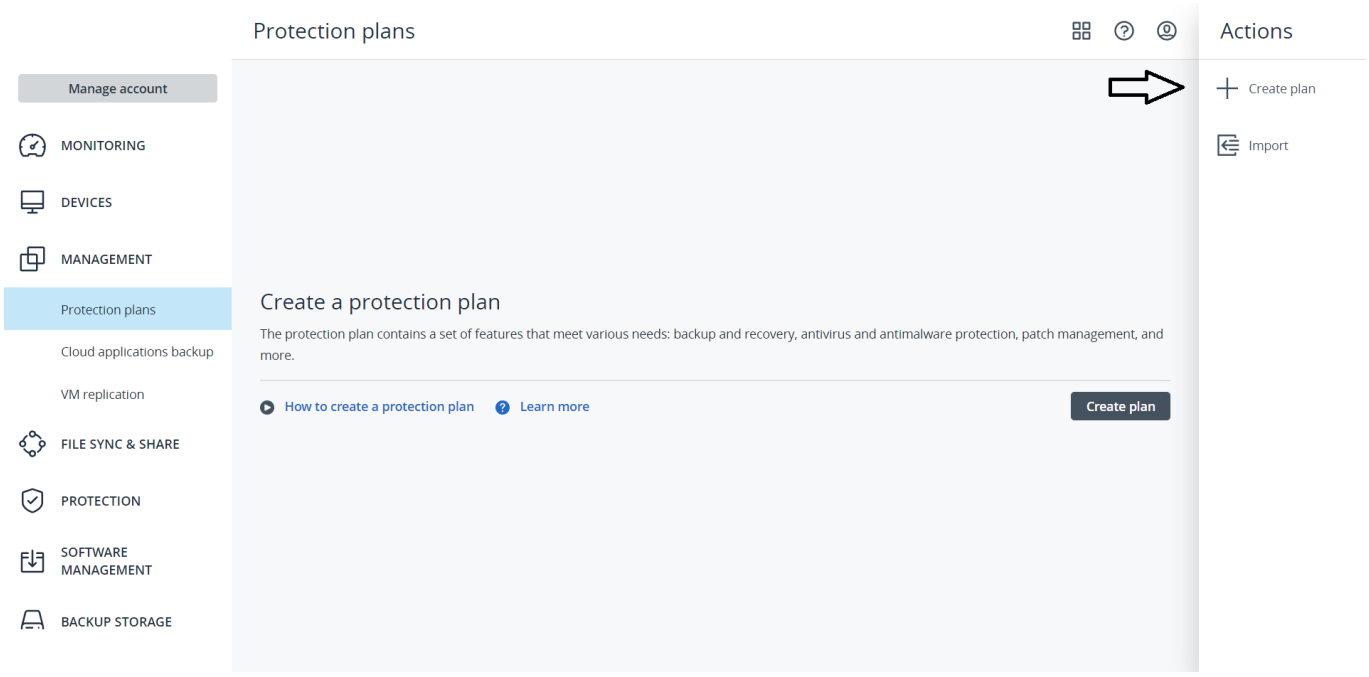

1. Open administration menu

To create a protection plan, please go to the Acronis Cyber Protect management console. Under the 'Management' tab, you will find the subcategory 'Protection plans'. Click 'Protection plans' to start editing.

2. create a plan

Please continue with the creation of the plan. On the right-hand side, another tab appears under the name "Actions". There you will find the option "Create plan".

3. adapt protection plan

General Service Questions

After you have initiated the creation of the protection plan, you can now customise how the protection plan should look. There are several options to choose from, including: Backup, Antivirus & Antimalware Protection, Vulnerability Assessment and Device Control. Now you can select modularly which features you would like to have configured on the device(s).

4. select options

After the features have been selected, the device(s) can now be added.

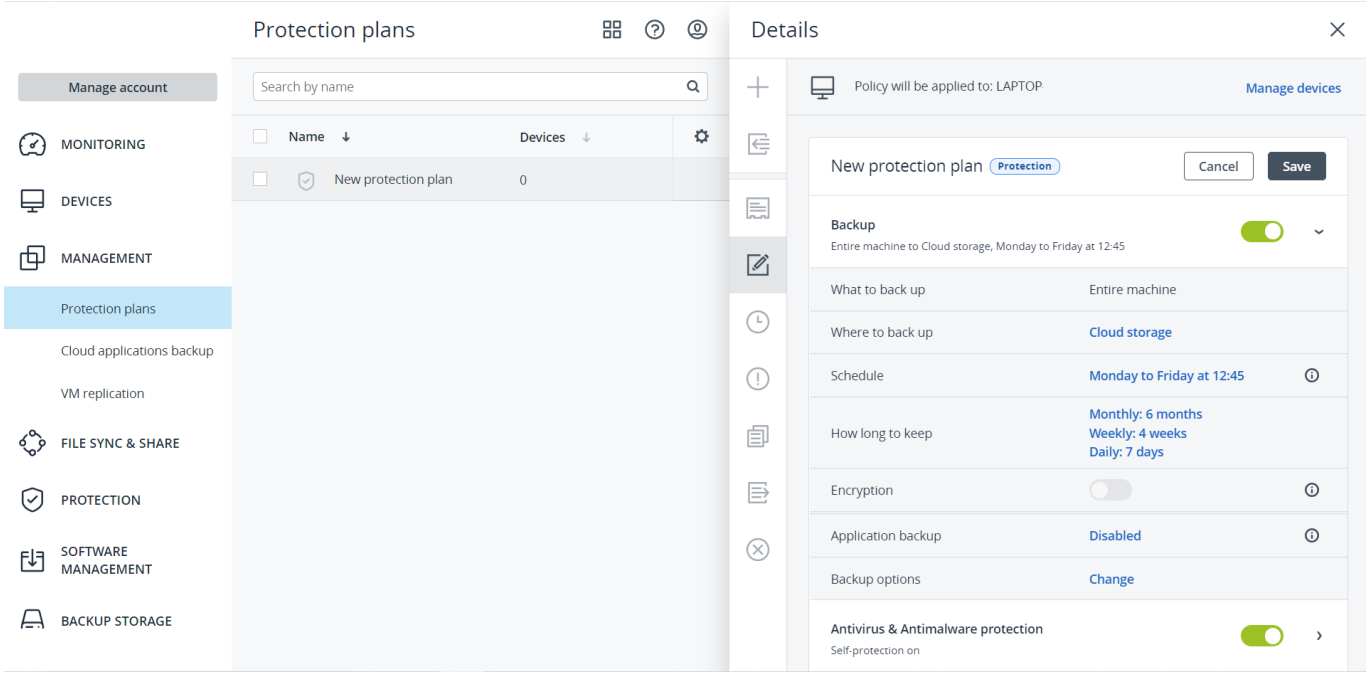

5. protection plan successfully created

Now the protection plan should appear in the administration and the configuration is complete.
