Colocation

How can I enter the data center during the nighttime?

The datacenter is also staffed 24/7 outside our business hours. You can ring the doorbell and will then be admitted. Please have your ID card ready if you have left a key with us so that the staff can help you quickly. The outside gate to the company premises is closed between 10:00 pm and 6:00 am. In this case, please call the number on the gate. An employee will then open the gate for you.

Please register your visit in advance by emailing pforte@myloc.de.

Please be sure to observe the current Corona regulations for your visit to our data center: Corona-Info
