Domains & SSL

I received an e-mail from InternetX, is that correct?

Yes, this is correct if you have started a transfer for a .com, .net, .org, .info or .biz domain.

You must confirm this e-mail from InternetX in order to transfer your domain to us.

This email is always sent to the admin-C of the domain to be transferred. Please make sure that this email address is reachable and that the email is confirmed before starting the transfer. Otherwise the transfer will not work.
