

Domains & SSL

Are other domain names available except .com .net .org .info and .net?

The myLoc managed IT AG also offer other domains beside the usual domains .com, .net, .org, .info and .de. For example, other domains like .asia, .uk, .co.uk, .tv, .eu and by far more can always be booked via the myLoc Customer Control Panel.

You can find a overview with the most used domains [here](#).

Unique solution ID: #1446
