

cPanel

How do I do the initial configuration with cPanel ?

If the installation of cPanel is finished, you first have to log into the WHM under <Your-IP>:2087 with the user name "root" and your password retrieved in the ZKM.

There you can enter your e-mail address and our name servers if you do not want to use your own.

cPanel

If there is no more test version available for this IP, unfortunately we can not reset this and a license must be ordered over the ZKM.

 **Zertifikatfehler** <https://f002.fuchsia.fastwebserver.de:2087/cpsess3341756732>

Cannot Read License File

To access the interface, you must install the license and ensure that the license is active.

The cPanel license server said that a license could not be issued for your server (66). For more information visit: <http://www.cpanel.net/lic.html> The exact message was: Already Used cPanel/WHM Trial License for this IP. (217.79.181.2)

The image shows a dark blue background with three white circular icons. The first icon contains the letters 'IP' with a red 'X' over it. The second icon shows a server rack with a red 'X' over it. The third icon shows a server rack with a red 'X' over it and a small truck icon below it.

- IP:** To ensure that the server is licensed, navigate to <http://verify.cpanel.net/>, and enter the server's public IP address.
- Server:** If the server is licensed, run the `/usr/local/cpanel/cpkeyctl` command as the `root` user.
- Port:** Make certain that port **80** is open to contact our license server and that your server's hostname is a FQDN.

If you do not currently own a license, register at the [cPanel Store](#) and [request a trial license](#).

You can purchase or lease a license directly from [cPanel](#), or from one of our [Partners](#).

After you successfully activate the license, [try login again in a few minutes](#) the page and the message will no longer display.

A license for the corresponding server can be ordered in the ZKM under "License Management":

The screenshot shows the cPanel interface with a navigation bar at the top containing 'Home', 'Verträge / Abrechnung +', 'Meine Produkte +', 'Domains +', 'Support +', and 'Persönliche Daten'. The 'Meine Produkte' menu is expanded, showing a list of services: 'Dedicated Root-Server', 'vServer Management', 'Cloud Produkte', 'Traffic-Statistik', 'Lizenz-Management', and 'RDNS Management'. A red arrow labeled '1.' points to the 'Meine Produkte' menu, and another red arrow labeled '2.' points to 'Lizenz-Management'. A third red arrow labeled '3.' points to a blue button labeled 'Lizenz bestellen' in the top right corner of the main content area. Below the menu, there are three rows of 'Plesk - Web Admin' entries, each with a checkbox and an 'Anzeigen' button.

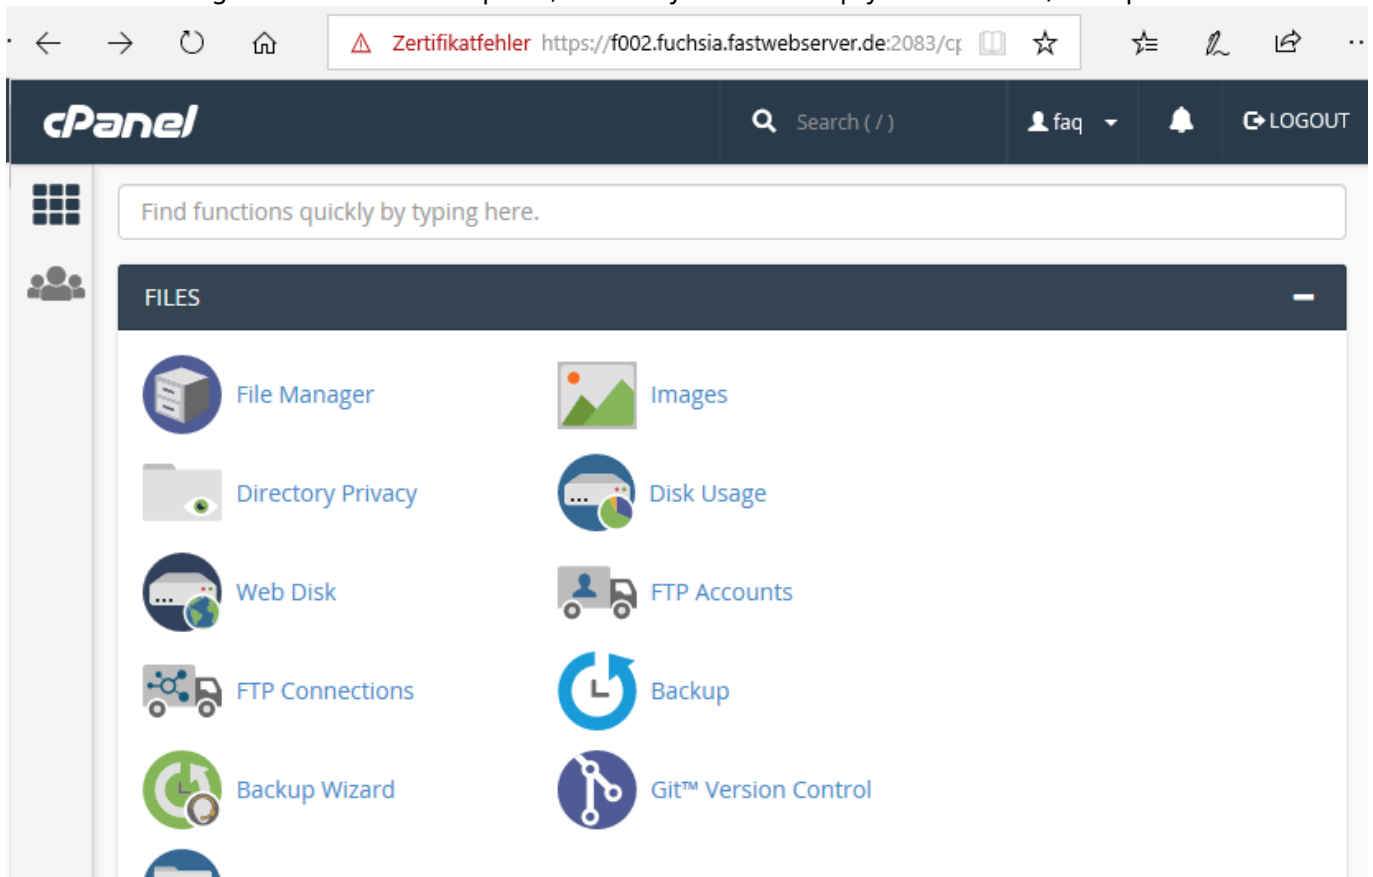

cPanel

As soon as a user has been successfully created, you can login under "https://<Your IP>:2083/".

Account Creation Status: ok (Account Creation Ok)

The initial configuration is now complete, so that you can setup your domains/webpace etc. now:
