

Cloud Hosting

Acronis Cyber Protect - Create a protection plan

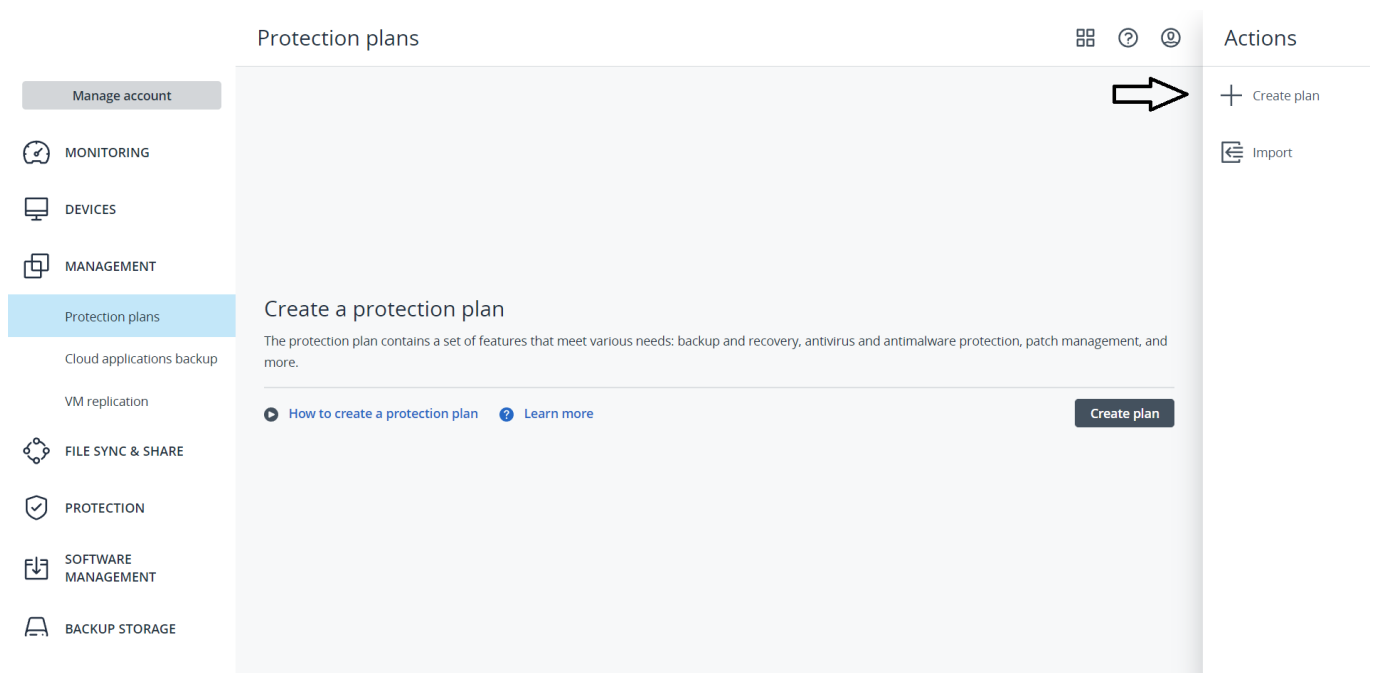

1. Open administration menu

To create a protection plan, please go to the Acronis Cyber Protect management console. Under the 'Management' tab, you will find the subcategory 'Protection plans'. Click 'Protection plans' to start editing.

2. create a plan

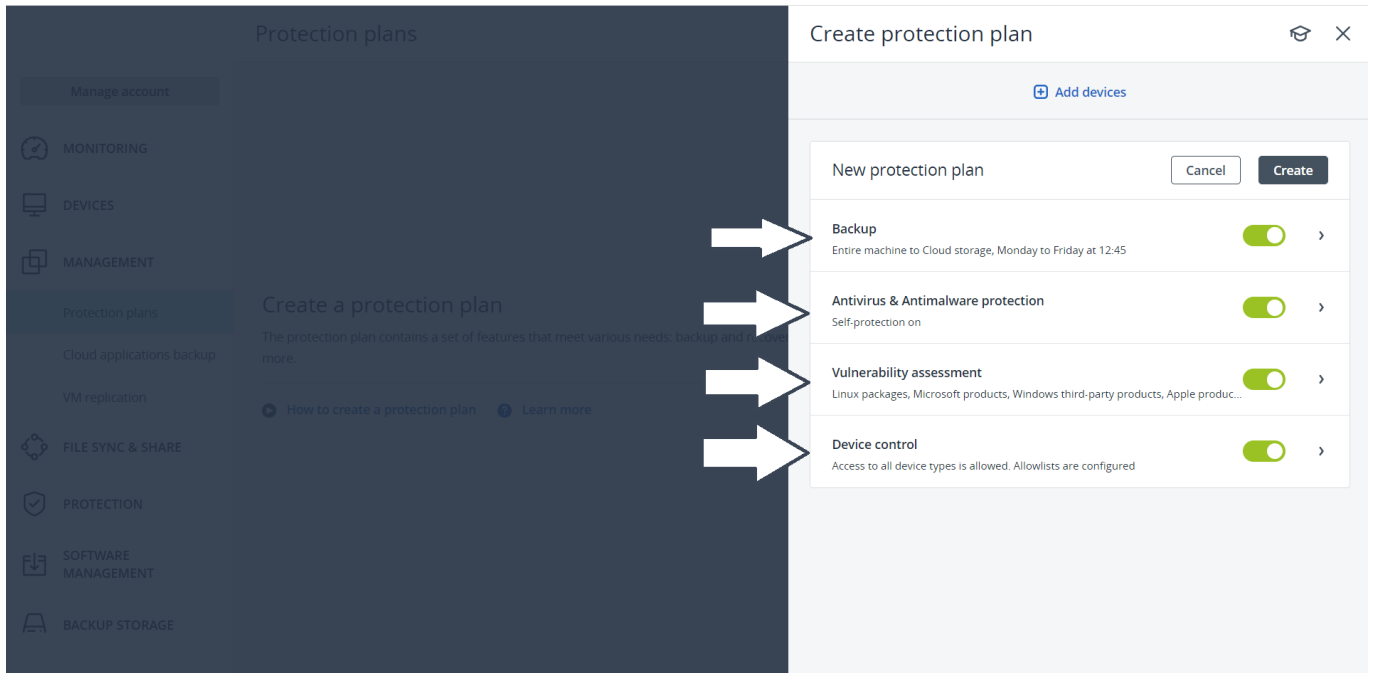

Please continue with the creation of the plan. On the right-hand side, another tab appears under the name "Actions". There you will find the option "Create plan".

3. adapt protection plan

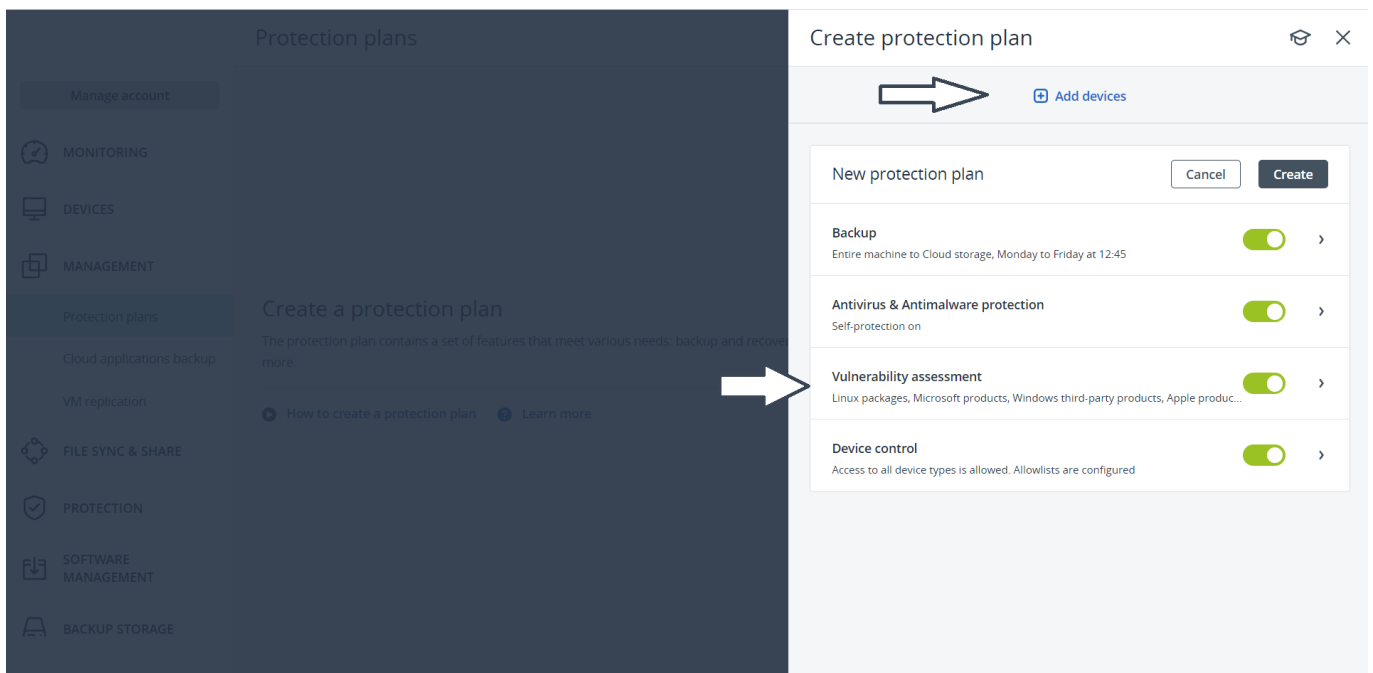

Cloud Hosting

After you have initiated the creation of the protection plan, you can now customise how the protection plan should look. There are several options to choose from, including: Backup, Antivirus & Antimalware Protection, Vulnerability Assessment and Device Control. Now you can select modularly which features you would like to have configured on the device(s).

4. select options

After the features have been selected, the device(s) can now be added.

5. protection plan successfully created

Now the protection plan should appear in the administration and the configuration is complete.

Cloud Hosting

The screenshot displays a web interface for managing cloud hosting protection plans. On the left is a navigation sidebar with categories: Manage account, MONITORING, DEVICES, MANAGEMENT, Protection plans (highlighted), Cloud applications backup, VM replication, FILE SYNC & SHARE, PROTECTION, SOFTWARE MANAGEMENT, and BACKUP STORAGE. The main area is titled 'Protection plans' and contains a search bar and a table with columns for Name and Devices. A table entry shows 'New protection plan' with 0 devices. To the right, a 'Details' panel is open, showing configuration for a 'New protection plan'. At the top of the details panel, it states 'Policy will be applied to: LAPTOP' and includes a 'Manage devices' link. The configuration includes a 'Backup' section with a toggle switch, 'What to back up' (Entire machine), 'Where to back up' (Cloud storage), 'Schedule' (Monday to Friday at 12:45), 'How long to keep' (Monthly: 6 months, Weekly: 4 weeks, Daily: 7 days), 'Encryption' (disabled), 'Application backup' (Disabled), 'Backup options' (Change), and 'Antivirus & Antimalware protection' (Self-protection on).
