Is it possible to get a BGP session?

Yes, this is possible for our Co-Location customers. We will provide you with a full-table BGP session through our three multi-hop BGP route-servers.

Please take care to use all three route-servers for your announcement, as single route-servers can be taken offline at any time for maintenance purposes. This way the sessions will continue to be fully redundant even during times of maintenance.

In order to setup your BGP session, we will need the following information from you:

- Autonomous System Numer (ASN)
- AS-SET
- IP Address of your Router(s)

Please contact us through the ticket system to start this process.

Unique solution ID: #1351
